PHRED SEZ.....

So You Want to Buy a Used Diesel Motorhome!

J. Fred Ettline, WBCCI #27910

Several of my friends are in the market for a used diesel motorhome, either as a change from their current Airstream trailer or as a newer used motorhome update. In contemplating the potential purchase each has a wish list of standard or optional features desired on the newer unit. Perhaps they would like an exhaust brake, a diesel generator, dual pane windows, ceiling ducted air conditioning, a slide out, a larger water heater, an inverter, a solar charger, or some combination of these and other standard and/or optional equipment. They are shopping at dealers or on the Internet with some vehicles being in distant states. What makes their search confusing is that they are not sure what year or model Airstream motorhome has each desired feature as standard or optional equipment. Salesman and even some owners may be similarly in the dark regarding the equipment on a particular unit.

To provide some assistance in this dilemma they have requested that appropriate diesel motorhome information be collected so that analysis of all these variables would be easier and searching would be more focused and successful. Believing that an informed shopper is a committed purchaser, what follows is a compilation of information regarding 1995 or newer diesel units from Airstream literature and other sources. If you can not find the information under a particular model year, look at the earlier comparable model since all features were not repeated every model year in the interest of brevity. The author wishes to express appreciation for help provided by Dave Schumann, Jim Parrett and Bob Wheeler of Airstream, as well as David White, Franklin Simmons, Larry Jones, Don Shafer, Ewart Phillips, Ed Nackman, Marion Elledge, Tom Tisdell, Earl Leggett, Joe Ramseur, Nye Thatcher, and Martin Miller. The abbreviations LY and FY stand for last year and first year in the document. Any errors, omissions or oversights are entirely the author's.

95 Classic
230 Cummins DSL
36' on Spartan Chassis
Tires (Spare) 225/70 R 19.5
Automatic Leveling Jacks
Rear TV monitor, 2 Skylights
6 way power driver/passenger seat
Pleated day/night shades, Oak Galley Floor
10'4" ext. height, Corian galley
Porcelain sink, 6.5 LP generator,

**6 gal water htr., 80 gallons fuel

H carrying 6385 lbs @120

Optional

Full Paint, Washer Dryer, Power Cord Reel

Skylight, Power Pass Seat w. footrest,

Rear Ladder, Bath Fantastic Fan

2003

In 2003 Airstream continued 39 foot diesel models from 2002, featuring running changes and upgrades. Specifically they:

-Introduced new 2003 SKYDECK with 12' 6" exterior travel height when folded - limited production of 100 units. (Other 39 foot models are 11' 10" exterior height.)

Roof capacity of 15 people. GCWR 36000 lbs before S/N 810839 and 41000 after S/N 810839

-Land Yacht 390D models continued: X L390 with one slide, XL 395 with two slides and a tub, XL 396 with two slides and a shower.

-Ceased production of 2003 Land Yacht 360 XC and Land Yacht 365 XL Diesel Motorhomes in September 2002.

No 2003 Motorhome literature printed.

2004

In 2004 Airstream continues on their 2003 line up except for the discontinuance of the XL 395. The Skydeck is now referred to as the 390 SD. The refrigerator door is now finished in stainless steel.

All 2004 Airstreams have improved tank sensors for black, gray, and fresh water.

There is one pressure sensor at the bottom of each tank to measure the weight of the tank contents. Interior headroom of 78 ½". Bedrooms include a 20" TV and a DVD player with surround sound. In the galley there is a standard free-standing dinette.

2005

Airstream is planning to introduce a Classic Diesel motorhome on a raised rail frame with a double slide in 37 and 39 foot sizes on a W24 Workhorse Chassis.
